

VENUE INSPECTION CHECKLIST

Throws

Venue

- Are the circle, cage, and sector clear of all loose material?
- Are implements on a cart or in ONE area near the circle but outside the cage or throwing area?
- Are officials stationed in a safe zone – AT LEAST one meter beyond the stretch point of the netting?
- Is the venue adequately marked with fencing/roping to keep spectators out?
- Are other events adjacent to the throwing area in danger of stray implements?
- Are officials controlling the circle/runway and sector during warm-ups and competition?
- Is there a reasonable possibility that athletes, officials, media, or spectators could cross the landing area?
- Is the spectator area a safe distance behind cage and away from the sector/runway?
- (Javelin) Are no implements in hands except the active thrower and the on-deck athlete?
- (Javelin) Are javelins being carried vertically?
- (Javelin) Is there adequate supervision of the warm-up sticking throws?
- Will the throwing arena have adequate Marshal supervision during warm-ups and competition?
- Has the media been given instructions as to safe areas for their work?
- Is there a clear line of site for laser measurement if used?

Circle

- Is the circle sunken or have a raised rim?
 - Is the rim the correct depth?
 - Is the rim rounded with no jagged edges?
- Surface
 - If the circle is wood, is it secured so it will not slide when used?
 - Is the circle smooth?
 - Is the circle free of debris (sand, leaves stones, rubber pellets, etc.)?
- Is the area outside the circle clear of obstructions?
- Are there items (i.e. brooms, towels) for cleaning the circle surface if needed?

Cage

- Is the height sufficient: rear of circle – 4m for discus, 5m for hammer, 3.66m for weight; front of ring – 4m for discus, 6.15m for hammer; 3.66m for weight?
- Are there any holes in the netting larger than 44mm?
- Are there any weak spots in the netting?
- Is the netting securely fastened?
- Can the net stop a hammer without rebounding toward an athlete?
- Has the netting been pulled to determine its stretch and to establish a safe zone AT LEAST one meter beyond the stretch point?
- Is the cage at least 3.5m from the center of the ring for hammer and 2.5m for weight?
- Doors:
 - Is there a mark for each door at both the open and closed positions?
 - Is there a way to anchor the door in both the open and closed positions?

Javelin Runway

- Is the runway smooth with no holes or bumps?
- Is the runway 4 meters wide?
- Is the area around the runway clear of obstructions?

Sector

- If temporary lines, are they anchored so they will not move and people do not trip over the anchors?
- Is the landing area smooth with no bumps or holes?
- Is there a possibility that thrown implements will land on track?

Vertical Jumps

Pit

- Are the pits at least the minimum size required for that level of competition and compliant with the latest rule requirements? If not, DO NOT CONDUCT THE EVENT.
- Are the pads positioned securely?
 - Are there any holes in the pads?
 - Are the pads free of debris?
 - Pole vault - is the collar around the sides and back of the box?
- Are the standards placed correctly?
- Is the area surrounding the pit clear of obstructions?
- Is there a possibility that a crossbar or pole will be knocked onto the track?
- Will an exiting athlete obstruct the running events?

Apron or Runway

- Is the area or runway of sufficient size?
- Is it free of debris (sand, leaves, stones, rubber pellets, etc.)?
- Does the approach come off of the track, cross a drain, or change surface?
- Location of the runway:
 - Is it near the track?
 - Are other events taking place at the same time in the area?
 - Is there adequate room for athletes and officials to conduct the competition without impeding another event?
 - Is there a reasonable possibility that a non-competitor could cross the runway?
- (NFHS and USATF Youth) Is there a location and a scale to check vaulter and pole weights?

Horizontal Jumps

Pit

- Is the sand raked, soft, and free of debris?
- Is the area surrounding the landing area clear of obstructions?
- Will landing in the horizontal jump pit put sand on the track? If yes, is there a plan to address this situation?
- If the pit is surrounded by drainage plates, are these plates unbroken and secure?
- Will raking activity potentially obstruct the running events?
- Are additional rakes and other tools placed in such a way as to avoid injury?
- Will an exiting athlete obstruct the running events?
- Are media personnel in a safe area for themselves, athletes, and officials?

Take-off Board

- If wooden, is it smooth and level with the runway, and is it secure?

Runway

- Is the length sufficient?
- Is the runway free of debris?
- Location of the runway:
 - Is it near the track?
 - Are other events taking place at the same time in the same area?
 - Is there a reasonable possibility that a non-competitor could cross the runway or landing area?

© 2013, USATF Officials Training Subcommittee. This checklist is meant to raise common questions about reasonable steps to take to keep a venue safe. It is not exhaustive and may not cover all situations. It should not be construed as legal advice. Officials should follow rule book provisions, laws, and act reasonably.

Clerking

Area

- Is the area smooth with no bumps, holes, or obstructions?
- Is it located away from but near the track and field venues?
- Does it have easy and safe access to venues?
- Does it have sufficient space for athletes?
- Is there a secure area for athlete bags?
- Are spikes permitted in the warm-up area? If not, is there an alternate warm-up location?

Track

Surface

- Is the surface level without bumps, bubbles, holes or gaps?
- Is the track clear of obstructions?
- Are the curbs in their appropriate place? If not, are there cones?

Venue

- Is there an obstacle-free zone on the inside and outside of the track at least one meter in width?
- Is the track properly cordoned off to keep spectators from entering and to control entrance to venues?
- Is there a location for competing athletes to wait for their heat/section?
- Is there an easy exit from running events?

Blocks

- Are the blocks stored on a cart or at least one meter away from the start, finish, inside, and outside of the track?
- Are there adequate holding pins secured in bottom of the block?

Hurdles

- Are the hurdles properly stacked on carts or piles one meter from the inside or outside of track?
- Are the hurdles easily adjusted to the proper height?
- Are the weights easily adjusted for the proper height?
- Are the steeplechase barriers securely fastened and at the proper height?
